PROGRAM EXECUTIVE OFFICE SOLDIER

Excerpt from DA PAM 670-1

- a. Boots, combat, tan, leather. The Army combat boots (HW and temperate weather) are clothing bag issue items.
 - (1) Description. The two types of issue Army combat boots (HW and temperate weather) are made of flesh-side out cattlehide leather with a plain toe and tan outsoles. Soldiers are required to possess two pairs of issue Army combat boots (HW) and one pair of issue Army combat boots (temperate weather) (specification) boots.
 - (a) The issue Army combat boot, HW, is made of tan-colored, flesh-side out cattlehide leather and nylon duck upper, removable cushioned insert, a closed loop speed lace system, and drainage eyelets.
 - (b) The issue Army combat boot, temperate weather, is made of tan-colored, flesh-side out cattlehide leather and nylon upper, a weatherproof-breathable membrane with limited flame resistance, conduction heat resistance and liquid fuel penetration protection, removable insert, and a closed loop speed lace system.

- (2) How worn.
 - (a) The boots are laced diagonally with tan laces, with the excess lace tucked into the top of the boot under the bloused trousers or slacks, or wrapped around the top of the boot. Metal or plastic cleats and side tabs are not authorized for wear. Sewn-in or laced-in zipper or Velcro® inserts are not authorized.
 - (b) Rubber or pure polyether polyurethane soles are the only outsole material that currently meets the need for durability and traction on surfaces in multiple environments and temperature ranges. Other materials (that may be of a lighter weight) may have significant problems in these areas.

To ensure the safety of all personnel on Fort A.P. Hill, the Garrison Commander has established procedures to evaluate weather conditions to determine delaying the opening of the base and how to disseminate those decisions to employees. It is important that all personnel understand and heed these procedures.

Upon first indication of possible inclement weather, command personnel begin monitoring weather conditions regularly to determine potential impact upon base operations. As inclement weather nears or begins, the command monitors weather reports more frequently and begins to receive regular road condition reports from aboard base and in the surrounding community. Command personnel also communicate with local counties and the federal government concerning their assessments of the weather conditions.

Based upon the type and volume of expected precipitation and the capabilities of base equipment and personnel to keep the roads clear and safe for travel, the commander will make the decision to keep the base open, delay base opening, or close the base.

If inclement weather occurs during non-working hours, every attempt will be made to make the decision on the base's status prior to 5 a.m. ***That decision will be promulgated as a Base Weather Code as follows:***
